Hosting Platform:	cPanel, GitHub
Miscellaneous:	GIT (Versioning Management System), S3 Bucket (CDN using AWS) and Graph QL with apollo client.

## EMPLOYMENTDETAILS

**Since Aug, ' 2024- Dec-10h 2014: Shell India as Lead Software Engineer (Payroll: DTL)**

### Key Result Areas:

- Working on **Orbital SLMT (Shell Energy Marketing and Trading) - using JavaScript, TypeScript (80%), CSS, HTML, with React, Redux, Ag Grid).**
- Conduct Code Review** to ensure code quality and consistency & Guide and mentor front-end development team members, Ensure adherence to best practices and coding standards.
- Lead architectural discussions and design decisions for front-end systems, break down projects into manageable tasks and assign responsibilities.
- Collaborate with product managers and stakeholders to define project requirements and scope. conduct code reviews
- Implement testing strategies (**unit tests, integration tests using Vite with React Testing Library**) to maintain application stability.
- Work closely with back-end engineers, designers, and other stakeholders to create cohesive and efficient applications.

**Since July'2023- Feb' 2024: Deloitte as Lead Software Engineer (Payroll: Team lease)**

### Key Result Areas:

- Worked on <https://www.herbalife.com/en-sg/ui/category/by-need/healthy-weight> (using JavaScript, TypeScript, CSS, HTML, with React, **Redux**).
- Guide and mentor front-end development team members, Ensure adherence to best practices and coding standards.
- Lead architectural discussions and design decisions for front-end systems, break down projects into manageable tasks and assign responsibilities.
- Collaborate with product managers and stakeholders to define project requirements and scope. conduct code reviews to ensure code quality and consistency.
- Write high-quality, maintainable, and scalable code using front-end technologies (**e.g., React, Redux, JavaScript**).

- Implement testing strategies (unit tests, integration tests) to maintain application stability.
- Work closely with back-end engineers, designers, and other stakeholders to create cohesive and efficient applications.

### **Since Mar'2021- Feb' 2023: Tech Mahindra as Sr. Software Engineer(Zen3aquired by Tech M)**

#### **Key Result Areas:**

- Own and build next-generation web applications which are efficient, reusable front-end abstractions and systems.
- Explore and design lively and compelling consumer experiences (Worked for BT).
- Ensure that all the assigned systems are performing to scale **(using JavaScript, TypeScript, CSS, HTML, with React, Redux)**.
- Actively participate in design and code reviews to build robust applications and prototypes
- I have successfully guided teams through complex projects, leveraging my technical expertise and leadership abilities to deliver high-quality solutions.

### **Since Jun' 19-Mar`2021- March-2023 Adobe Inc. as UI Engineer-2 (Payroll: Quantum Leap)**

#### **Key Result Areas:**

- Worked on <https://helpx.adobe.com/in/photoshop/user-guide.html>
- Work closely with senior engineers to design, implement and deploy applications that impact the Adobe Inc. business with an emphasis on Mobile.
- Own the delivery of an integral piece of a system or application (associated with Adobe advertisement cloud team).
- Management and execution against project plans and delivery commitments.
- Create and execute appropriate quality plans, project plans, test strategies and processes for development activities in concert with business and project management efforts.
- Build next-generation web applications which are efficient, reusable front-end abstractions and systems.

### **Since Jan'19- Jun'19: Winds E world as UI Developer**

#### **Key Result Areas:**

- Proficient in view layout and rendering technologies (Responsiveness, progressive enhancement, browser/device support), when it is appropriate to make graceful fallbacks.
- Understands how to optimize the delivery of code and assets (image, fonts) to a browser or device (lazy loading assets, using CDNs, caching, compression, etc.)
- Understands the implication of introducing dependencies.
- Collaborate with other team members and stakeholders and reporting directly to Tech Lead/ Manager.
- Taking full ownership of the application from UI side for complete look and feel.

### **Since April'18 – Jan'19: Simplilearn Solutions Pvt. Ltd. Bangalore as Software Engineer**

#### **Key Result Area:**

- Accountable for creating a SAAS based application ([https://www.simplilearn.com/sem-landing/course/course\\_id/15/template/3](https://www.simplilearn.com/sem-landing/course/course_id/15/template/3), <https://www.simplilearn.com/tech-master-of-masters-program>, <https://www.simplilearn.com/corporate-training>, /higher-education-partnership-program-for-universities, /corporate-training, /refer-and-earn, / affiliate-program, /tutorials)
- Build reusable code and libraries for future use and Ensure the technical feasibility of UI/UX designs.
- Optimize application for maximum speed and scalability.
- Collaborate with other team members and stakeholders and reporting directly to Tech Lead/ Manager.
- Sometime got privilege to work with CTO directly

### **Sept'15 – June'17: Parnets Digital Advertisements Pvt. Ltd as Web Developer**

#### **Key Result Area:**

- Design & Developed UI & UX for different websites and web applications using HTML5, CSS3 & Bootstrap Worked on <https://parnetsgroup.com/>
- Writing modular predictable and maintainable code
- Design & developed stand-alone fully project from requirement collection to delivery of project.
- Performing all SEO task of self-developed application.

- Hosting on cPanel platform using FileZilla desktop application
